Staff Vacancy: Projects Web Developer

The Canadian CubeSat Conference (CCC), organized by SEDS-Canada as part of the Canadian CubeSat Network (CCN), is Canada's premier technical space conference focused on CubeSats and small satellites. It brings together students, alumni, researchers, and industry experts to share knowledge, showcase projects, and strengthen Canada's growing small-satellite community.

We are looking for a web developer/assistant to help maintain and update the Canadian CubeSat Conference website (ccc.seds.ca). The main focus of this role is uploading content, editing pages, and keeping the site useful for participants, speakers, sponsors, and the organizing team.

Primary duties:

- Upload and update website content, including speaker biographies, the conference schedule, abstracts, event details, and other relevant materials
- Edit existing webpages to keep information current and accurate
- Work with the Canadian CubeSat Conference team to update the schedule and support smooth transitions between speakers, networking events, workshops, and other activities
- Help manage submissions (such as abstracts) made through the webpage
- Maintain the webpages and coordinate with any external tech support if needed

Secondary duties:

- Help with audio-visual setup and support at the conference
- Handle online Zoom sessions (tech support, monitoring, and smooth operation during the event)

Requirements:

- Time commitment: 3–5 hours/week
- Experience with (or willingness to learn) Astro and its integrations
- Basic knowledge of HTML/JavaScript/web development is an asset (willingness to learn is fine)
- Experience with or willingness to learn about static sites hosted on Vercel.
- Good organizational and communication skills

This is an unpaid volunteer position. Prior experience is preferred but not required; the most important qualities are a willingness to learn and reliability in a fast-paced, professional environment.

This position is ideal for anyone who wants to get more experience in web development at a growing national non-profit; being a space enthusiast is a bonus.

Apply today by filling out the form at bit.ly/apply2seds. We'll get back to you by the end of the application window. **Deadline to apply: November 21, 2026.**
